Introduction for reading metacognition**YOUR STRATEGIES IN READING AND UNDERSTANDING TEXTS**

There are several approaches to studying and understanding texts. Some of them are more useful than others, depending on the kind of reading task. The next three questions present a number of reading tasks, followed by a list of these approaches or "strategies". We want to know your opinion about the usefulness of these strategies for the different reading tasks.

Each of the three questions starts with a short description of a particular reading task. Then several possible reading strategies are listed. Think about the usefulness of each of the strategies in relation to the given reading task only. Some strategies may be useful for one reading task but not for another.

Give a score between 1 and 6 to every strategy. A score of 1 means you think it is not a useful strategy at all for this reading task. A score of 6 means you think it is a very useful strategy for this reading task.

You can use the same score more than once if you think two or more strategies are similarly useful, but please select only one box in each row.

Reading task: You have to understand and remember the information in a text.
