

Skills Summit 2022: *Strengthening Skills for Equity and Sustainability*

25 March 2022

Providing Effective Upskilling and Reskilling Opportunities for All

El futuro
es de todos

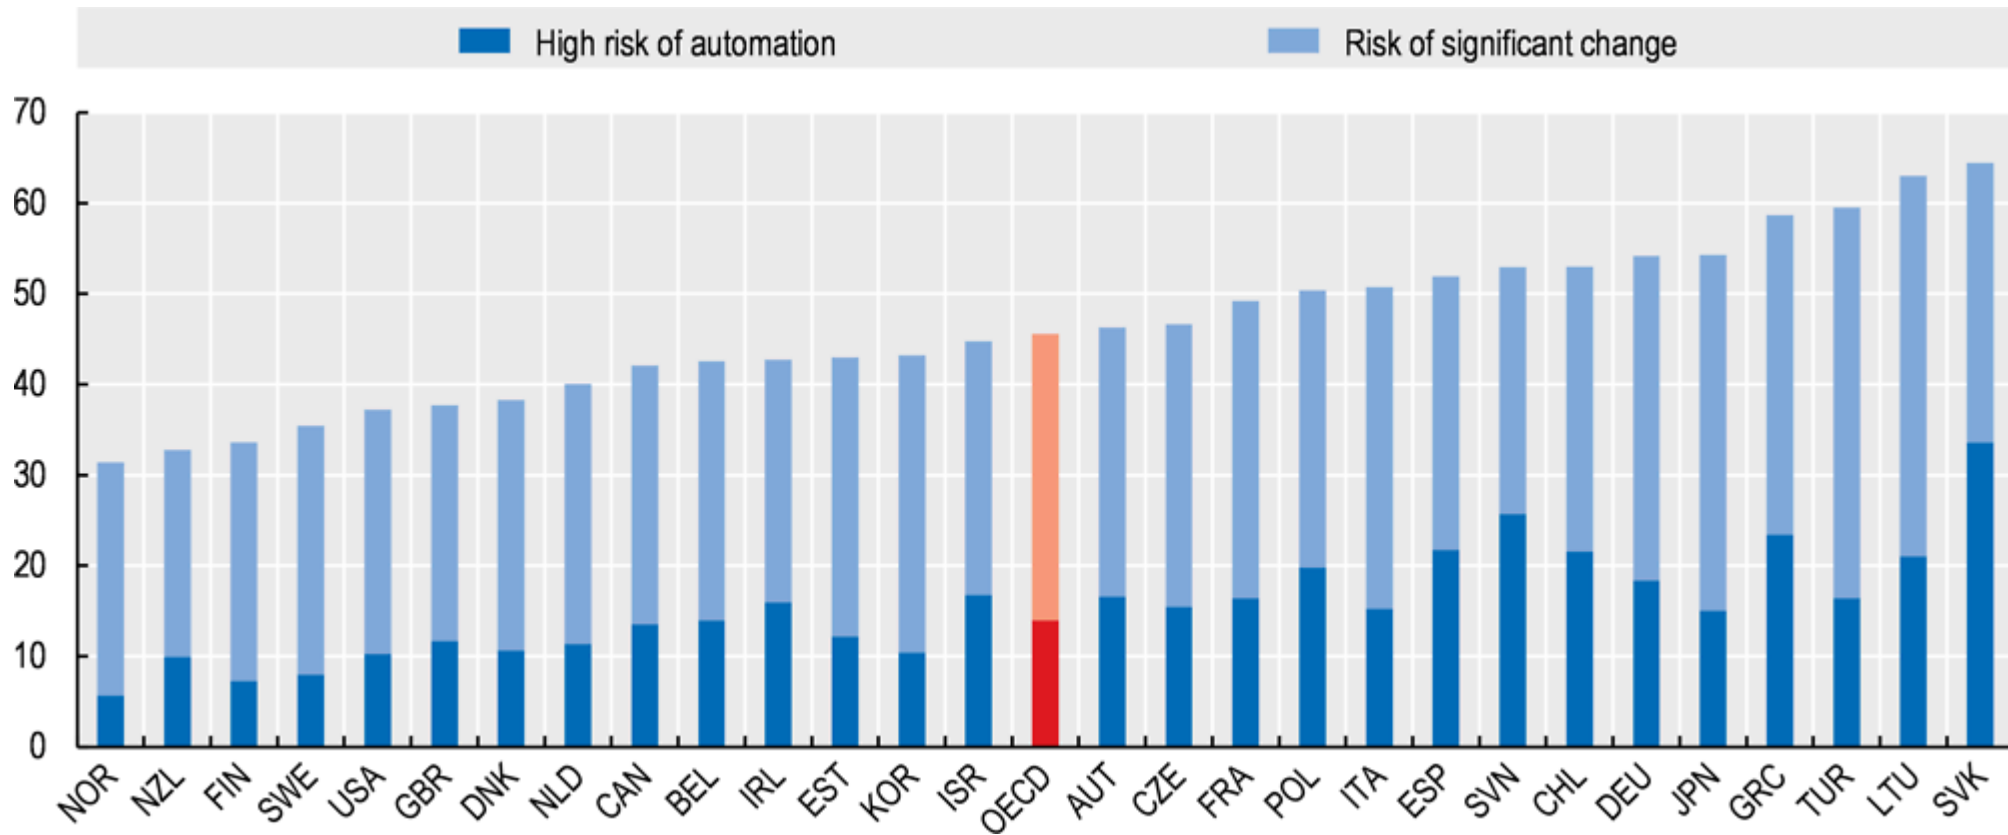

Gobierno
de Colombia

Technology will automate many tasks

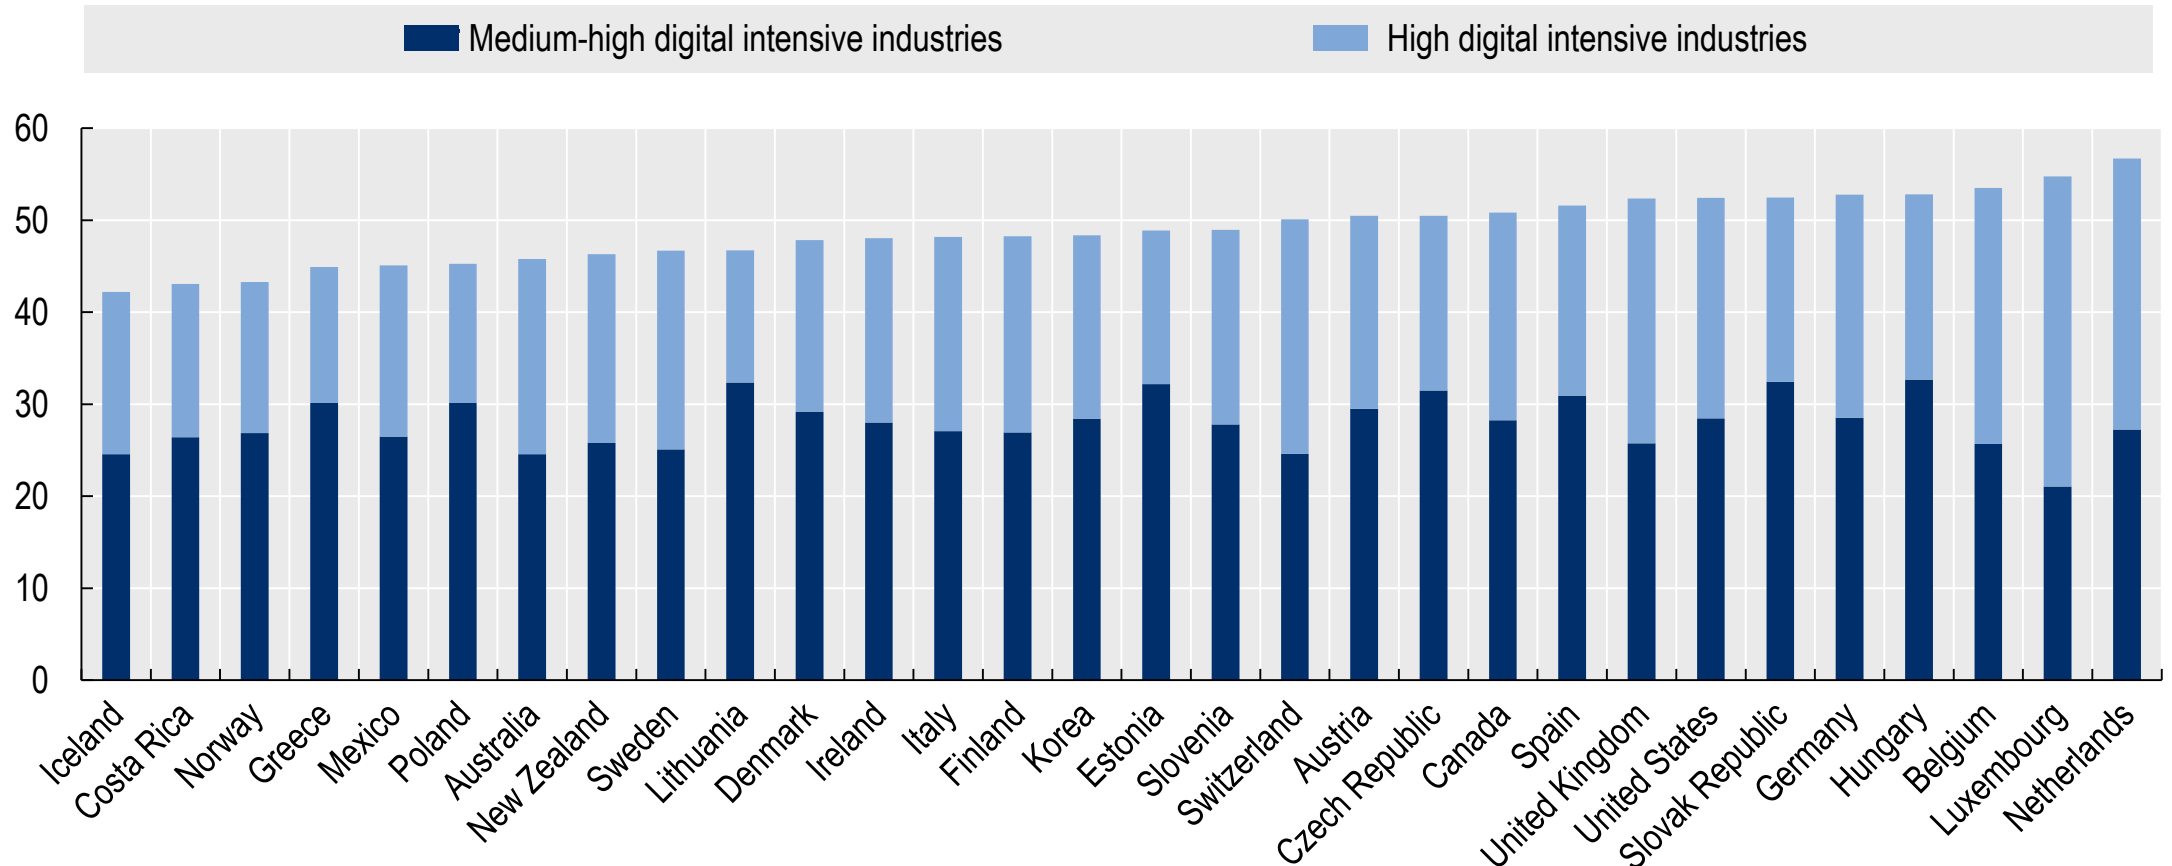

Share of jobs which are at a high risk of automation or at risk of significant change (%)

Many jobs are digitally-intensive

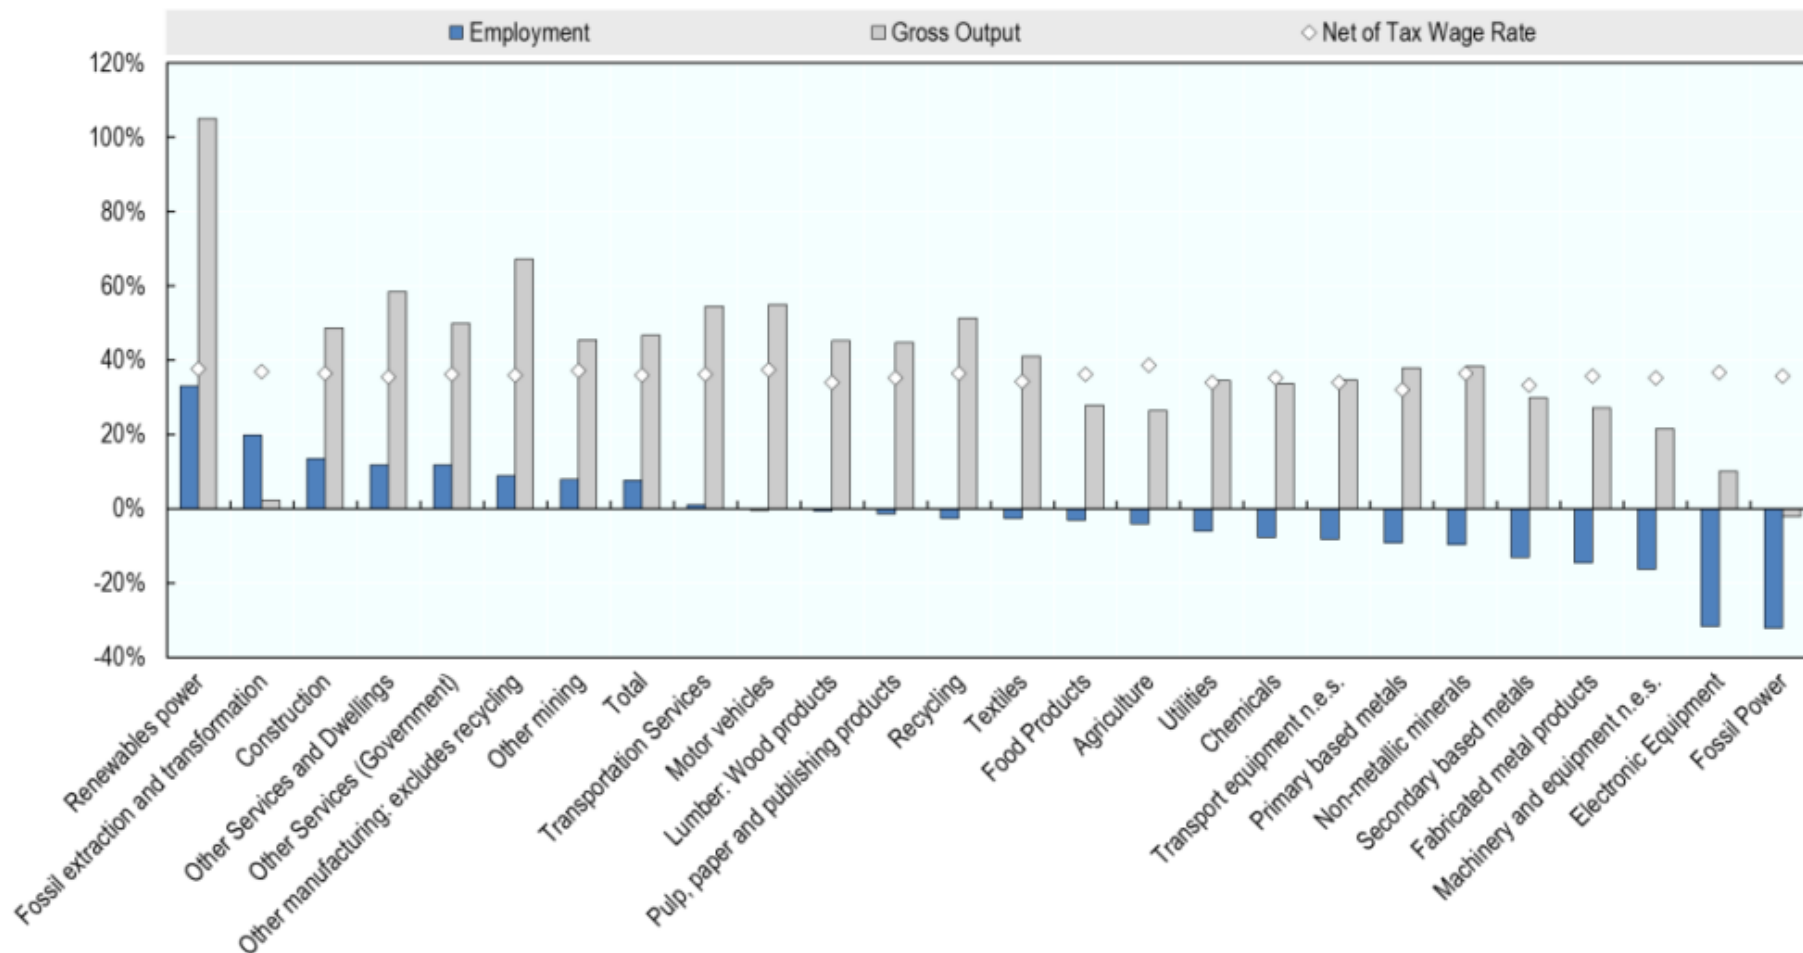

Employment in digital-intensive sectors as a share of total employment (2018)

The green transition will impact certain sectors more than others

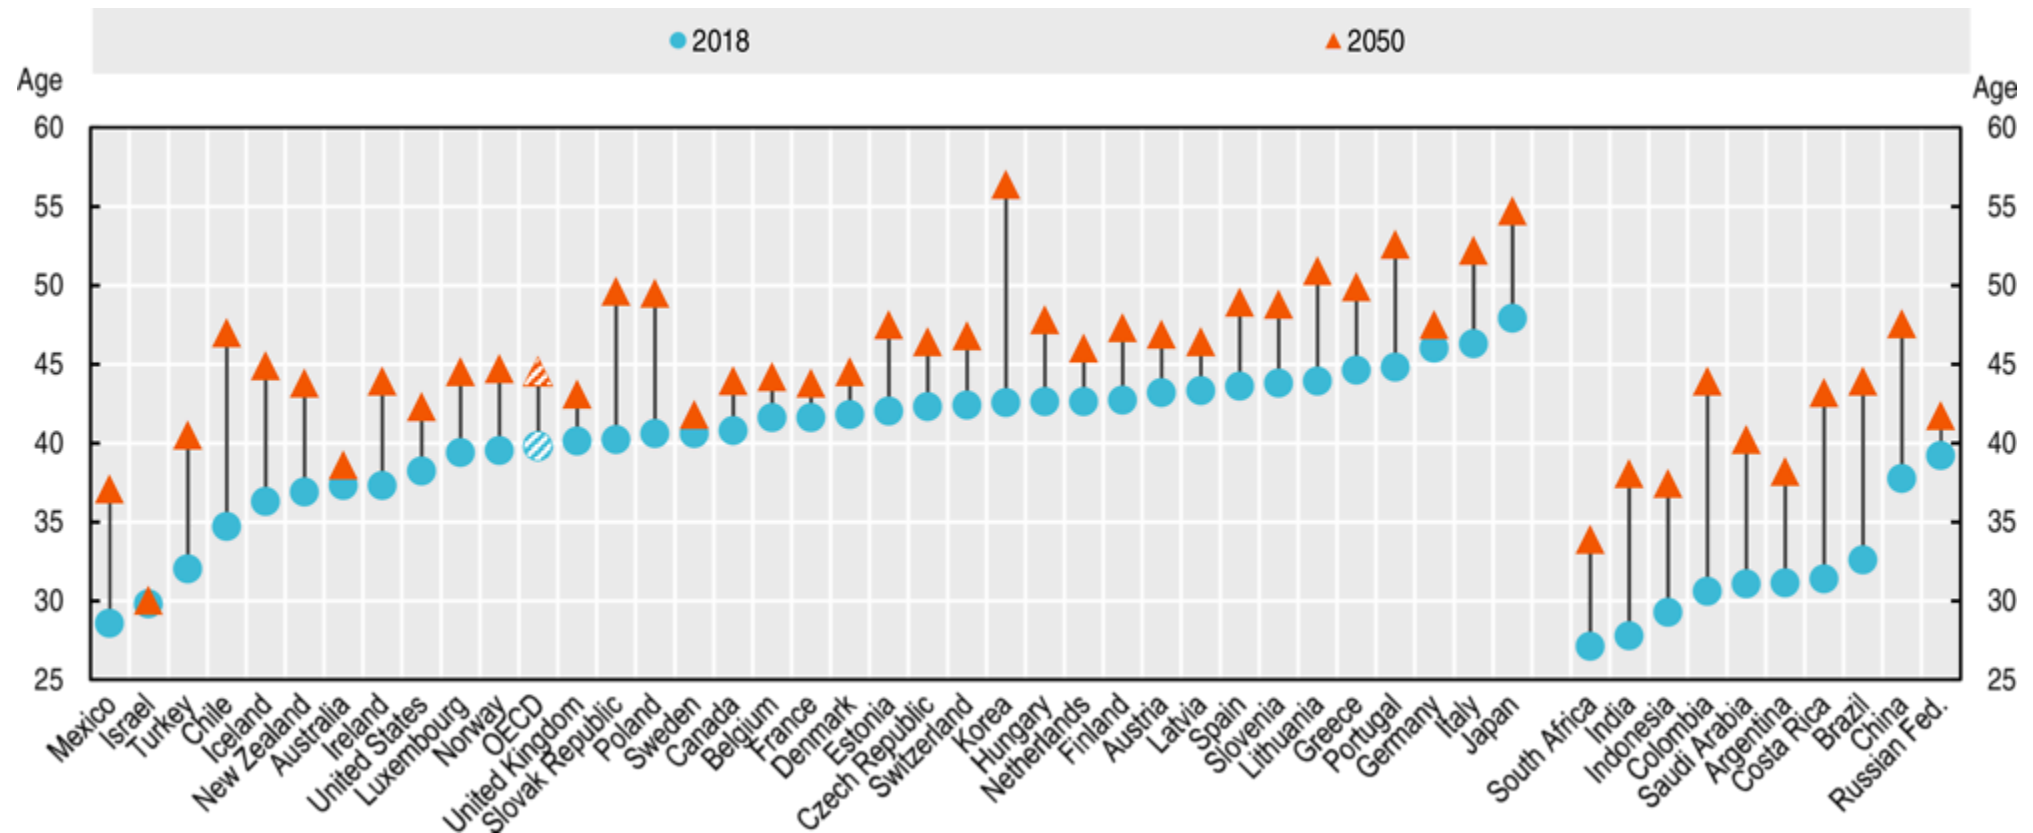

Projected changes in sectoral composition of employment and output following a policy-driven transition towards a more resource-efficient and circular economy (2040 baseline projection relative to 2017 values)

Rapid population ageing is widespread

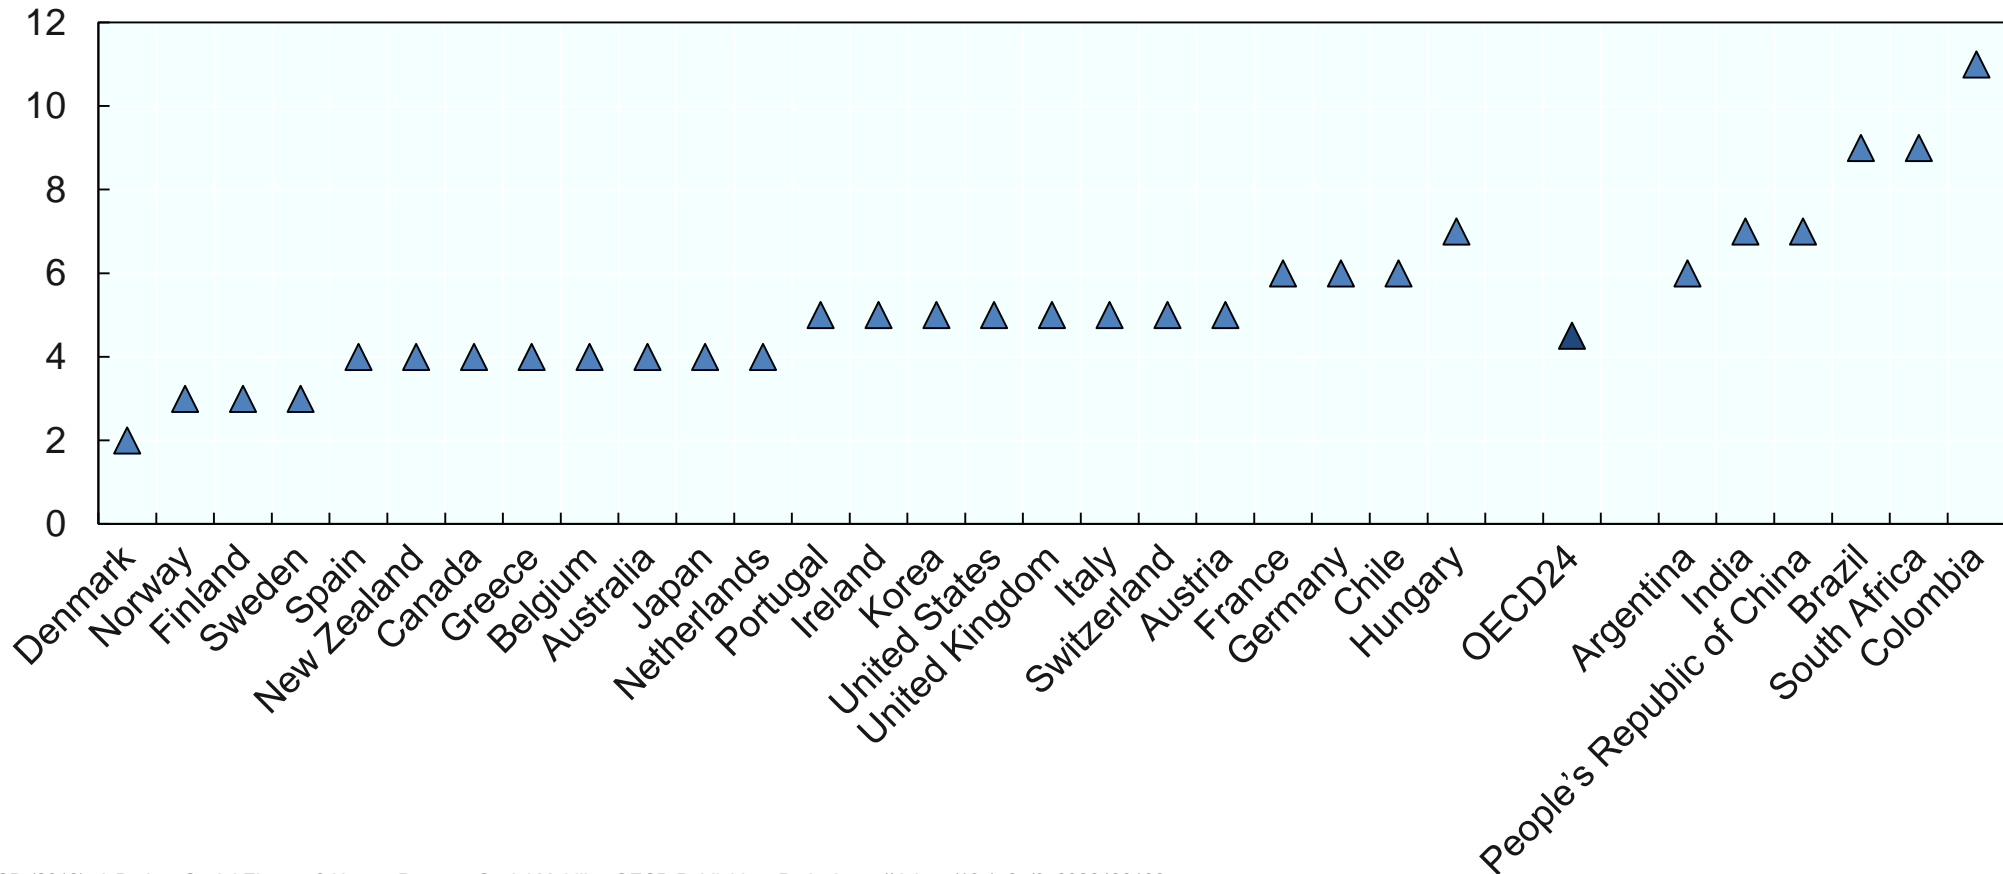

Median age of the total population (in years), 2018 and 2050

Social mobility across generations is low

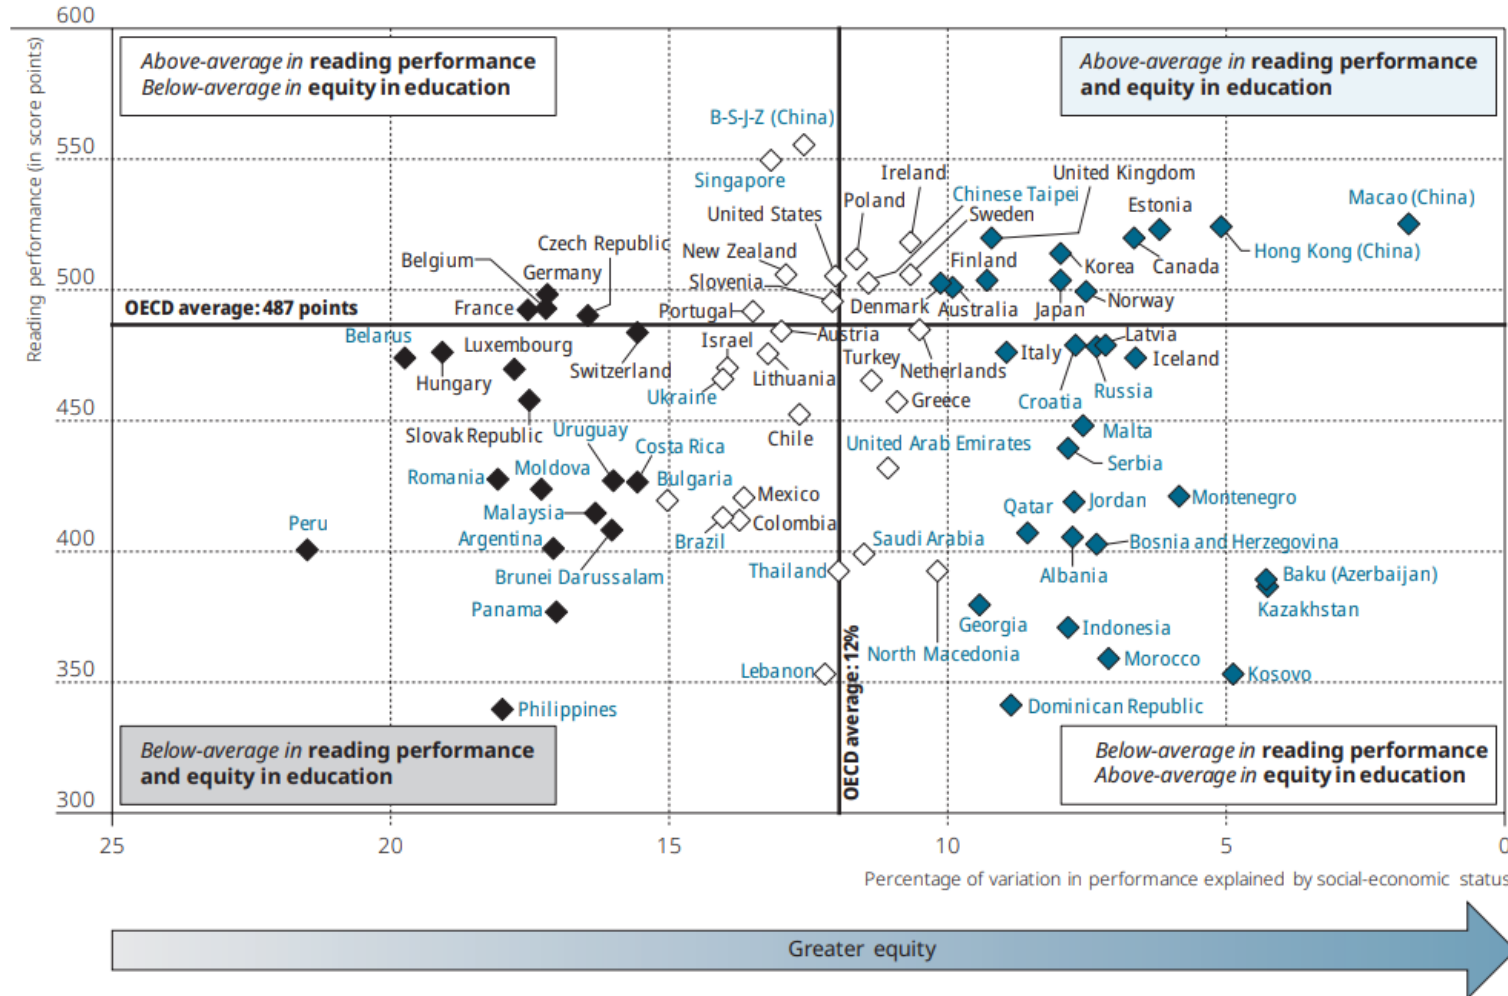

Expected number of generations it would take the offspring from a family at the bottom 10% to reach the mean income in society

High-performing education systems combine quality with equity

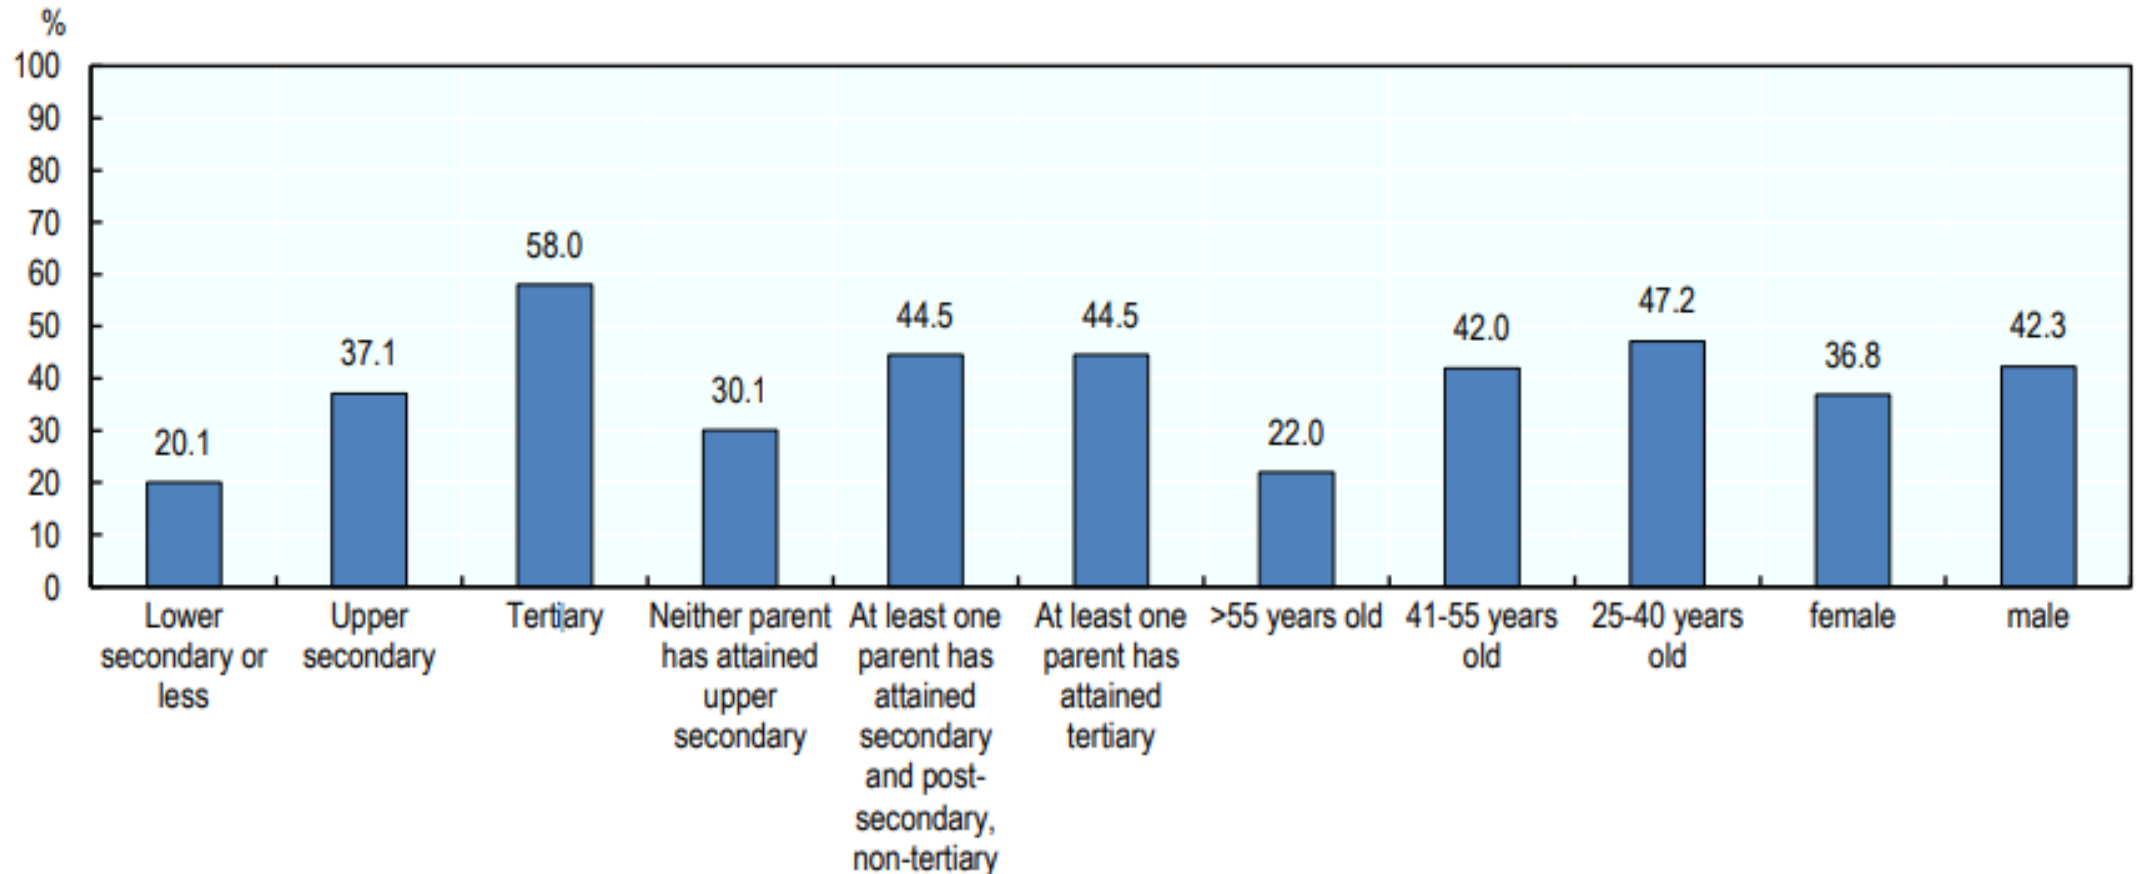

Reading performance and the relationship between student performance and socio-economic status (2018)

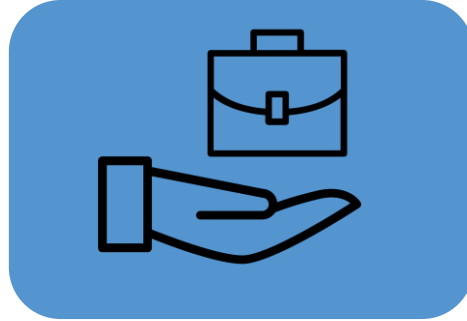

There are disparities in participation in adult learning

Percentage of 25-65 year-olds who reported participating in adult learning

Better skills for better lives

Labour market
outcomes

Health and
well-being

Civic and social
engagement

Equality

Thank you
