The challenge

Technology is advancing rapidly.

We can harness this transformation to deliver positive change.

But we need to get ahead of the potential long-term risks.

Aligning technology with our shared values

"The Global Forum on Technology will support a **better understanding and anticipation** of rapid developments in technology.

It will help identify the **policy tools and levers needed** to ensure that these developments foster trust, consistent with our **shared values and principles**."

Mathias Cormann, OECD Secretary-General

What we do

Facilitate conversations about how technology should be governed and used with the goal of aligning it with shared, democratic values.

Convene experts and policy makers to anticipate and proactively address the long-term opportunities and risks associated with technology.

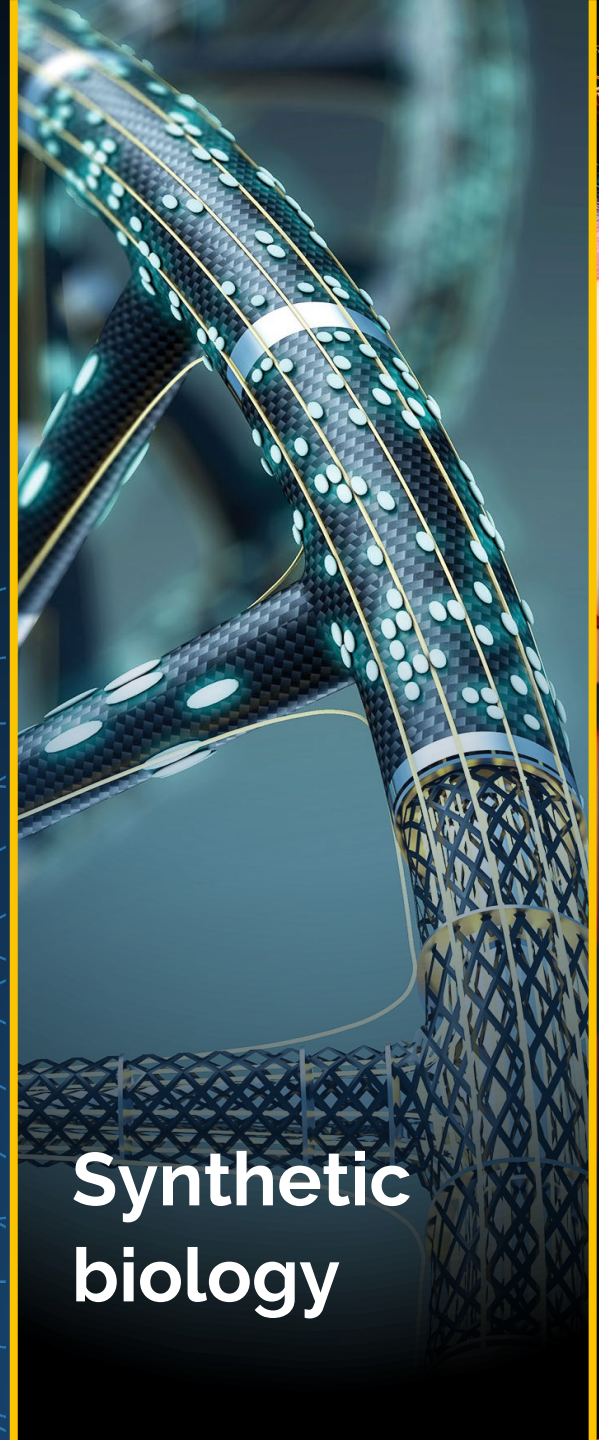
Cross-cutting themes

Ensuring **responsible** and rights-oriented technology development and deployment. 1

Harnessing emerging technologies for **resilient societies** and addressing **climate change**. 2

Improving technology policy to **bridge digital** and **technological divides.** 3

First set of technologies in focus



Synthetic biology

Immersive technologies

Quantum technologies

Inaugural event

The inaugural event took place on **6 June 2023** in the margins of the OECD Ministerial Council Meeting.

It brought together over **300 participants** from **+50 countries** including:

- ✓ **Senior policy makers**
- ✓ **Leading technology experts,**
- ✓ **A wide variety of stakeholders.**
