## *Foreword*

**T**his annual publication gathers detailed statistics for inward and outward foreign direct investment flows and positions (stocks) of OECD countries. Comparative tables and charts complement the information included for the statistics of each OECD country broken down by partner countries worldwide and by economic activity. The aim is to provide a reliable and comprehensive source of information to OECD governments, potential investors, globalisation analysts and the public at large. FDI database used for this publication is updated regularly from national sources of OECD countries and provides the basis for periodical analyses of direct investment trends and for regular examinations of policies towards international direct investment in Member countries.

This publication was prepared by Emilie Kothe with the supervision of Ayse Bertrand of the Investment Division but could not have been achieved without the contributions of the experts of the OECD Working Group on International Investment Statistics of the Investment Committee and the national administrations which they represent.

## Introduction

**F**oreign direct investment (FDI) activity of the OECD area marked a slow recovery in 2010 for the first time since the beginning of the global financial and economic crises, in line with the recovery observed worldwide. The slowdown of cross-border investments which started in 2008 continued in 2009 when FDI flows of OECD were divided by two as compared to historically high investments in 2007. FDI inflows in 2009 dropped to USD 645 billion (USD 1 355 billion in 2007) and outflows to USD 905 billion (USD 1 932 billion in 2007). The modest increase of FDI in 2010 became more significant in 2011 (around 20% increase) when OECD's FDI outflows reached USD 1 293 billion and inflows USD 825 billion. In spite of the relatively modest recovery, FDI outflows were slightly above OECD investments during the investment bubble a decade earlier (USD 1 253 billion in 2000) which was mainly the result of a few large cross-border mergers and acquisitions. However, FDI inflows to OECD remained below the peak of 2000 (USD 1 309 billion).

OECD countries continue to be exporters of capital with net outflows of USD 468 billion in 2011. While the OECD area continues to be the major source of FDI flows worldwide, in 2010 only 67% of OECD outflows (90% in 2000) were targeted to other OECD countries, a development which confirms the growing diversification of OECD investments in terms of host countries. On the other hand, 86% (96% in 2000) of inflows in the OECD area was sourced by OECD countries. Nevertheless, as host of investment worldwide, OECD's relative importance has been decreasing by almost one third in the last decade or so, when a growing number of non-OECD countries performed very well in attracting foreign direct investment flows. The stock of inward and outward OECD investment at end-2010 stood at USD 12 796 billion and USD 16 916 billion, respectively (approximately nine times more than at end-1990).

The present publication relies on a database developed by the OECD Directorate for Financial and Enterprise Affairs for comprehensive statistics on foreign direct investment. The database is sourced by official FDI statistics of thirty-four OECD members published by Central Banks and/or National Statistical Offices. The statistics cover FDI transactions (financial and income flows) and positions (stocks). Data are broken down by bilateral partner countries (worldwide) and by economic activity. All the statistics in this publication are presented in United States dollars to facilitate cross-country comparison. However, the same data series can be accessed electronically in national currencies.

The publication is organised in two parts:

- i) **Part 1. Comparative tables** comprises tables and charts, in broad aggregates, providing an overview for the period 2007-11 of inward and outward FDI flows and positions of thirty four OECD countries and eight non-OECD members of the G-20. The data presented in this part are mostly derived from balance of payments and international investment position statistics and, therefore, may differ slightly from detailed foreign direct investment statistics presented in Part 2.
- ii) **Part 2. Country tables** represent the bulk of the publication. Its focus is FDI statistics of individual countries. For each OECD country, there are four standard tables on inward and outward FDI flows and positions for the period 2006-10. The first two tables are geographical

*breakdowns of flows and positions by partner country; the other two tables present sectoral breakdowns according to ISIC3 (International Standard for Industry Sectors) classification. The publication covers a large selection of geographical and sectoral information; additional breakdowns are available and can be accessed at: <http://stats.oecd.org/index.aspx>.*

*The methodology for foreign direct investment statistics are based on the OECD Benchmark Definition of Foreign Direct Investment, 3rd edition and the IMF Balance of Payments Manual, Fifth Edition. OECD members have made efforts since the issuance of these manuals in 1995 to improve international comparability (see also further details on Foreign Direct Investment Statistics-How countries measure FDI (IMF/OECD, 2003).*

*Direct investment is a category of cross-border investment made by a resident in one economy (the direct investor) with the objective of establishing a lasting interest in an enterprise (the direct investment enterprise) that is resident in an economy other than that of the direct investor. The motivation of the direct investor is a strategic long-term relationship with the direct investment enterprise to ensure a significant degree of influence by the direct investor in the management of the direct investment enterprise. The “lasting interest” is evidenced when the direct investor owns at least 10% of the voting power of the direct investment enterprise. Direct investment may also allow the direct investor to gain access to the economy of the direct investment enterprise which it might otherwise be unable to do.*

*Direct investment enterprises are corporations, which may either be subsidiaries, in which over 50% of the voting power is held, or associates, in which between 10 and 50% of the voting power is held, or they may be quasi-corporations such as branches which are effectively 100% owned by their respective parents. The relationship between the direct investor and its direct investment enterprises may be complex and bear little or no relationship to management structures. Direct investment relationships are identified according to specific criteria.*

*Direct investment statistics cover all cross-border transactions and positions between enterprises which are a part of the same group of enterprises. FDI statistics include direct investment positions (equity and other capital), direct investment income flows (distributed earnings, reinvested earnings, interest income) and direct investment financial flows (equity, reinvested earnings and debt). While FDI financial flows inform on investment trends in a given period FDI positions provide the basis for structural analysis.*

*The geographical allocation of FDI in this publication represents transactions/positions recorded for the first counterpart, i.e. for the immediate partner country (as opposed to ultimate investor or ultimate host). The classification for economic activity should, in principle, represent the activity of the direct investment enterprise, i.e. the activity of the resident direct investment enterprise for inward investments and the activity of the non-resident direct investment enterprise for outward investments.*

## General notes

- Data cut-off date for Comparative Tables 1 to 4: 15th July 2012. Data cut-off date for Comparative Table 5 and Country Tables: 29th February 2012.
- FDI flows and FDI positions are converted using average exchange rates and end of period exchange rates respectively. Data in national currencies are available and can be accessed at: <http://stats.oecd.org/index.aspx>.
- The following applies to Israel as reporting country:

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

- **Note for Cyprus:**

*Footnote by Turkey:* The information in this document with reference to “Cyprus” relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Turkey recognises the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of the United Nations, Turkey shall preserve its position concerning the “Cyprus issue”.

*Footnote by all European Union member States of the OECD and the European Commission:* The Republic of Cyprus is recognised by all members of the United Nations with the exception of Turkey. The information in this document relates to the area under the effective control of the Government of the Republic of Cyprus.

- **Notes to Comparative Tables:**

- ❖ Tables 1 and 2 are based on balance of payments (BOP) and international investment position (IIP) statistics and, hence, may be different from disaggregated data provided in Country tables.
- ❖ OECD aggregate includes 34 countries.
- ❖ G-20 aggregate includes: Argentina, Australia, Brazil, China, Canada, France, Germany, India, Indonesia, Italy, Japan, Korea, Mexico, Russia, Saudi Arabia, South Africa, Turkey, United Kingdom, United States.

- **Notes to Country Tables:**

- ❖ Tables 1 and 2:
  - “Total World” is the sum of FDI to/from all continents: Europe, Africa, America, Asia, and Oceania and Polar regions.
  - Partner area “OECD” includes 30 countries until end 2009 and 34 countries from 2010 onwards.

- ❖ Tables 3 and 4: “Unallocated investment”: investment not allocated to any specific economic sectors

## **ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT**

The OECD is a unique forum where governments work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD member countries are: Australia, Austria, Belgium, Canada, Chile, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The European Union takes part in the work of the OECD.

OECD Publishing disseminates widely the results of the Organisation's statistics gathering and research on economic, social and environmental issues, as well as the conventions, guidelines and standards agreed by its members.

# OECD International Direct Investment Statistics

Driven by technological change, global competition and the liberalisation of markets, international direct investment plays a key role in the process of global economic integration. OECD compiles and disseminates reliable and up-to-date statistics which are essential for a meaningful interpretation of investment trends for informed policy making. These statistics are based on official reports by OECD countries for investments worldwide. Internationally comparable data makes it possible to measure the degree of economic integration and competitiveness of markets.

## ECONOMIES COVERED

Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States, Argentina, Brazil, China, India, Indonesia, Russian Federation, Saudi Arabia, South Africa.

## Also available on CD-ROM and on line

The data in this publication are also available on line via [www.oecd-ilibrary.org](http://www.oecd-ilibrary.org) under the title *OECD International Direct Investment Statistics* (<http://dx.doi.org/10.1787/idi-data-en>).

An offline edition of the database, providing data in CSV format is available on CD-ROM under the title *OECD International Direct Investment Statistics 2012*.
