ISBN 978-92-64-19167-9 (PDF)

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

**Corrigendum**

Revised version April 2013

The following list provides a description of the changes made to the publication since the original version was printed.

**PART II.**

Country tables:

*Tables 1 and 2:* for all countries, data for Chile, Estonia, Israel and Slovenia have been included for the years of their OECD membership.

*Table 3:* outward investment data have been corrected for all countries.

Page 232: Notes to Country Tables:

- *Tables 1 and 2:* (additional note)
  - ❖ Data prior to 2010 for Chile, Estonia, Israel and Slovenia as partner countries are available and can be accessed at <http://dx.doi.org/10.1787/idi-data-en>.

Corrigenda to OECD publications may be found on line at: [www.oecd.org/publishing/corrigenda](http://www.oecd.org/publishing/corrigenda).

## Foreword

*This annual publication gathers detailed statistics for inward and outward foreign direct investment flows and positions (stocks) of OECD countries. Comparative tables and charts complement the information included for the statistics of each OECD country broken down by partner countries worldwide and by economic activity. The aim is to provide a reliable and comprehensive source of information to OECD governments, potential investors, globalisation analysts and the public at large. FDI database used for this publication is updated regularly from national sources of OECD countries and provides the basis for periodical analyses of direct investment trends and for regular examinations of policies towards international direct investment in Member countries.*

*This publication was prepared by Emilie Kothe with the supervision of Ayse Bertrand of the Investment Division but could not have been achieved without the contributions of the experts of the OECD Working Group on International Investment Statistics of the Investment Committee and the national administrations which they represent.*

## Introduction

**G**lobal foreign direct investment flows (FDI) fell sharply in 2009 (by 38%) from the previous year but the recovery which was recorded in 2010 (annual increase of 24%) continued modestly in 2011, reaching some USD 1 637 trillion (annual increase of 16%). However, preliminary estimates for 2012 indicate that FDI flows dropped for three consecutive quarters confirming a declining trend since the beginning of the year. Global flows for the first nine months of 2012 were, in aggregate, USD 959 billion (18% lower than a year earlier). The stock of global FDI stood at USD 21.1 trillion at end-2011.

In 2012, China became the first FDI destination world-wide while the United States maintained its position as the leading investing economy. During the period January-September 2012, China attracted the lion's share of global FDI flows with USD 170 billion followed by the United States (USD 104 billion), Brazil (USD 48 billion), the United Kingdom (USD 47 billion), and France (USD 46 billion). These five economies hosting FDI received 45% of global inflows during the first nine months of 2012 (as compared to 37% in the first three quarters of 2011).

The slowdown of cross-border investments which started in the second half of 2008 continued in 2009 when FDI flows of OECD were divided by two as compared to historically high investments in 2007. FDI inflows in 2009 dropped to USD 648 billion (USD 1 359 billion in 2007) and outflows to USD 913 billion (USD 1 929 billion in 2007). However, cross-border investments of OECD economies picked up in 2010 and 2011. In 2010, FDI inflows to the region increased less significantly (by 10% to USD 711 billion) as compared to the outflows (which increased by 19% to USD 1 090 billion). In 2011, OECD economies attracted USD 855 billion FDI (annual increase of 20%) while OECD investments abroad have grown more modestly (by 17% to USD 1 274 billion). The share of intercompany debt for both inflows and outflows decreased since 2008 (to 19% of inflows and to 13% of outflows in 2011) while the share of reinvestment of earnings increased, in particular for outflows (24% of inflows and 39% of outflows).

During the first nine months of 2012, FDI inflows to OECD dropped by 26% from a year earlier (33% in the European Union to USD 209 billion), representing 47% of global inflows (51% a year earlier). This decline was largely due to significant decreases in Italy (by 95% from a year earlier to USD 1.2 billion), Belgium (by 80% to USD 14 billion), the United States (by 34% to USD 104 billion) and Germany which recorded negative inflows at -1.3 billion as a result of both disinvestments (in equity) and intercompany debt. These declines were partly offset by a significant recovery (annual increase of 45%) of FDI received by France, to USD 46 billion.

OECD countries continue to be exporters of capital with net outflows of USD 419 billion in 2011. While the OECD area remains as the major source of FDI flows worldwide, in 2011 only 67% of OECD outflows (90% in 2000) were targeted to other OECD countries, a development which confirms the growing diversification of OECD investments in terms of host countries. On the other hand, 86% (96% in 2000) of inflows in the OECD area was sourced by OECD countries. Nevertheless, as host of investment worldwide, OECD's relative importance has been decreasing by almost one third in the last decade or so, when a growing number of non-OECD countries performed very well in attracting foreign direct investment flows.

At USD 801 billion, OECD's FDI outflows represented 80% of global outflows for the period January-September 2012. In the same period, the United States, the largest single investing economy world-wide, recorded USD 281 billion outflows which accounted for 28% of global outflows (or 35% of OECD or 39% of G20 economies). Other significant investing countries during the first three quarters of 2012 were Japan (USD 88 billion), the United Kingdom (USD 78 billion), Germany (USD 55 billion), France (USD 47 billion) and China (USD 42 billion).

At end-2011, stock of inward FDI for the OECD area as a whole was USD 13.4 trillion (or 29% of its GDP) while outward investments reached USD 17.9 trillion (or 39% of its GDP). The stock of OECD's direct investment at end-2011 was approximately nine times more than at end-1990. Regarding the economic sectors attracting FDI, the most dominant sector for OECD's direct investment is the service sector which accounted for 61% (USD 7 639 billion) of its inward investment stocks at end-2011 and 65% of outward investments (USD 11 187 billion). This is followed by the manufacturing sector which represents 24% (USD 3 001 billion) of inward investment stocks and 22% of outward investments (USD 3 837 billion).

The present publication relies on a database developed by the OECD Directorate for Financial and Enterprise Affairs for comprehensive statistics on foreign direct investment. The database is sourced by official FDI statistics of thirty-four OECD members published by Central Banks and/or National Statistical Offices. The statistics cover FDI transactions (financial and income flows) and positions (stocks). Data are broken down by bilateral partner countries (worldwide) and by economic activity. All the statistics in this publication are presented in United States dollars to facilitate cross-country comparison. However, the same data series can be accessed electronically in national currencies at: <http://dx.doi.org/10.1787/idi-data-en>.

The publication is organised in two parts:

- i) **Part 1. Comparative tables** comprises tables and charts, in broad aggregates, providing an overview for the period 2007-11 of inward and outward FDI flows and positions of thirty four OECD countries and eight non-OECD members of the G20. Moreover, quarterly estimates are included for FDI flows for the first three quarters of 2012. The data presented in this part are mostly derived from balance of payments and international investment position statistics and, therefore, may have minor differences from detailed foreign direct investment statistics presented in Part 2 and in some of the charts. For most recent data, the reader may access quarterly releases of the FDI in Figures which may be downloaded from the OECD investment statistics web site: [www.oecd.org/investment/statistics.htm](http://www.oecd.org/investment/statistics.htm).
- ii) **Part 2. Country tables** represent the bulk of the publication. Its focus is FDI statistics of individual countries. For each OECD country, there are four standard tables on inward and outward FDI flows and positions for the period 2007-11. The first two tables are geographical breakdowns of flows and positions by partner country; the other two tables present sectoral breakdowns according to ISIC3 (International Standard for Industry Sectors) classification. The publication covers a large selection of geographical and sectoral information; additional breakdowns are available and can be accessed at: <http://dx.doi.org/10.1787/idi-data-en>.

The methodology for foreign direct investment statistics are based on the OECD Benchmark Definition of Foreign Direct Investment, 3rd edition and the IMF Balance of Payments Manual, Fifth Edition. OECD members have made efforts since the issuance of these manuals in 1995 to improve international comparability (see also further details on Foreign Direct Investment Statistics-How countries measure FDI (IMF/OECD, 2003).

Direct investment is a category of cross-border investment made by a resident in one economy (the direct investor) with the objective of establishing a lasting interest in an enterprise (the direct

investment enterprise) that is resident in an economy other than that of the direct investor. The motivation of the direct investor is a strategic long-term relationship with the direct investment enterprise to ensure a significant degree of influence by the direct investor in the management of the direct investment enterprise. The “lasting interest” is evidenced when the direct investor owns at least 10% of the voting power of the direct investment enterprise. Direct investment may also allow the direct investor to gain access to the economy of the direct investment enterprise which it might otherwise be unable to do.

Direct investment enterprises are corporations, which may either be subsidiaries, in which over 50% of the voting power is held, or associates, in which between 10 and 50% of the voting power is held, or they may be quasi-corporations such as branches which are effectively 100% owned by their respective parents. The relationship between the direct investor and its direct investment enterprises may be complex and bear little or no relationship to management structures. Direct investment relationships are identified according to specific criteria.

Direct investment statistics cover all cross-border transactions and positions between enterprises which are a part of the same group of enterprises. FDI statistics include direct investment positions (equity and other capital), direct investment income flows (distributed earnings, reinvested earnings, interest income) and direct investment financial flows (equity, reinvested earnings and debt). While FDI financial flows inform on investment trends in a given period, FDI positions provide the basis for structural analysis.

The geographical allocation of FDI in this publication represents transactions/positions recorded for the first counterpart, i.e. for the immediate partner country (as opposed to ultimate investor or ultimate host). The classification for economic activity should, in principle, represent the activity of the direct investment enterprise, i.e. the activity of the resident direct investment enterprise for inward investments and the activity of the non-resident direct investment enterprise for outward investments.

## Notes

### **General notes:**

- FDI flows and FDI positions are converted using average exchange rates and end of period exchange rates, respectively. Data in national currencies are available and can be accessed at: <http://dx.doi.org/10.1787/idi-data-en>.
- Data exclude Special Purpose Entities (SPEs) for Austria, Hungary, Luxembourg (except in Comparative Table 6 and Country Tables 1 and 3) and the Netherlands.
- Global FDI: By definition, inward and outward FDI worldwide should be equal. However, in practice, there are statistical discrepancies between inward and outward FDI. Global FDI flows and stocks are estimated as the average of these two figures.

### **The following applies to Cyprus as partner country:**

- *Footnote by Turkey:* The information in this document with reference to “Cyprus” relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Turkey recognises the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of the United Nations, Turkey shall preserve its position concerning the “Cyprus issue”.
- *Footnote by all European Union member States of the OECD and the European Commission:* The Republic of Cyprus is recognised by all members of the United Nations with the exception of Turkey. The information in this document relates to the area under the effective control of the Government of the Republic of Cyprus.

### **The following applies to Israel as reporting country:**

- The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

### **Notes to Comparative Tables:**

- Tables 1, 2 and 4 are based on balance of payments (BOP) and international investment position (IIP) statistics and, hence, may be slightly different from disaggregated data provided in Country tables and some of the charts.
- OECD aggregate includes 34 member countries.
- G20 aggregate includes 19 countries: Argentina, Australia, Brazil, China, Canada, France, Germany, India, Indonesia, Italy, Japan, Korea, Mexico, Russia, Saudi Arabia, South Africa, Turkey, the United Kingdom, the United States.

**Notes to Country Tables:**

- Data for 2011 are preliminary.
- Tables 1 and 2:
  - ❖ “Total World” is the sum of FDI to/from all continents (Europe, Africa, America, Asia, and Oceania and Polar regions) and unallocated.
  - ❖ Partner area “OECD” includes 30 member countries until end 2009 and 34 members from 2010 onwards.
  - ❖ Data prior to 2010 for Chile, Estonia, Israel and Slovenia as partner countries are available and can be accessed at <http://dx.doi.org/10.1787/idi-data-en>.
  - ❖ “Unallocated”: Investments not allocated to any specific continent.
- Tables 3 and 4: “Unallocated investment”: investment not allocated to any specific economic sector.

## **ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT**

The OECD is a unique forum where governments work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD member countries are: Australia, Austria, Belgium, Canada, Chile, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The European Union takes part in the work of the OECD.

OECD Publishing disseminates widely the results of the Organisation's statistics gathering and research on economic, social and environmental issues, as well as the conventions, guidelines and standards agreed by its members.

## OECD International Direct Investment Statistics

Driven by technological change, global competition and the liberalisation of markets, international direct investment plays a key role in the process of global economic integration. OECD compiles and disseminates reliable and up-to-date statistics which are essential for a meaningful interpretation of investment trends for informed policy making. These statistics are based on official reports by OECD countries for investments worldwide. Internationally comparable data makes it possible to measure the degree of economic integration and competitiveness of markets. Quarterly data for international direct investment flows in US dollars are available for the first time in this edition.

### ECONOMIES COVERED

Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States. Argentina, Brazil, China, India, Indonesia, Russian Federation, Saudi Arabia, South Africa.

### Also available on CD-ROM and on line

The data in this publication are also available on line via [www.oecd-ilibrary.org](http://www.oecd-ilibrary.org) under the title *OECD International Direct Investment Statistics* (<http://dx.doi.org/10.1787/idi-data-en>).

An offline edition of the database, providing data in CSV format is available on CD-ROM under the title *OECD International Direct Investment Statistics 2013*.

Consult this publication on line at <http://dx.doi.org/10.1787/idis-2013-en>.

This work is published on the OECD iLibrary, which gathers all OECD books, periodicals and statistical databases. Visit [www.oecd-ilibrary.org](http://www.oecd-ilibrary.org) for more information.
