Main country groupings

In the country comparisons tables provided in Part I, data are given for individual member countries and for the group of countries *OECD-Total*. The country composition of this group is:

OECD-Total: The 34 OECD countries.

Sources and methods

Detailed methodological information per country available as metadata at:
http://stats.oecd.org/Index.aspx?datasetcode=GOV_DEBT.

Feature articles: www.oecd.org/std/finance.

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

Concepts and definitions

Central Government

The central government subsector consists of the institutional units making up the central government plus those NPIs (non-profit institutions) that are controlled and mainly financed by central government. The political authority of central government extends over the entire economy. Central government has therefore the authority to impose taxes on all residents and non-residents units engaged in economic activities within the country. [*System of National Accounts, 1993, par. 4.117-118*]

General government

The general government sector consists mainly of central, state and local government units together with social security funds imposed and controlled by those units. In addition, it includes non-profit institutions engaged in non-market production that are controlled and mainly financed by government units or social security funds. [*System of National Accounts, 1993, par. 4.9*]

Market value

Transactions are valued at the actual price agreed upon by the transactors. Market prices are thus the basic reference for valuation in the System. In the absence of market transactions, valuation is made according to costs incurred (non-market services produced by government) or by reference to market prices for analogous goods or services (services of owner-occupied dwellings). Assets and

liabilities are valued at current prices at the time of which the balance sheet relates, not at their original prices. [System of National Accounts, 1993, par. 2.68-69]

Maastricht Treaty: Debt criteria

Institutional coverage

General Government is strictly defined in the European System of Accounts 1995 (ESA95).

Instrument coverage

“Maastricht” debt covers all ESA95 (and System of National Accounts 1993) financial instruments except financial derivatives, shares and other accounts payable (trade credits and advances are excluded).

Methodology

“Maastricht” debt is recorded “gross” as the nominal outstanding amount at the end of each year. It is a “consolidated debt”, excluding any reciprocal financial assets and liabilities between units classified within General Government. The nominal value is defined as the “face value”, excluding any accrued interest. The nominal value of an index-linked liability is the face value adjusted by the index-related change in the principal value accrued to the end of the year. As a matter of principle, liabilities originally denominated in foreign currencies are converted into national currency on the basis of the representative market exchange rate prevailing on the last working day of each year. However, where such liabilities are exchanged through contractual agreements, the rate agreed upon those contracts should be taken into account (when General Government receives a foreign currency through the exchange, the final conversion into national currency is based on the market exchange rate). Source: EUROSTAT.

Additional note

Please note that data are not available for Table 2. Central government debt by instrument, gross and net issues for Greece and New Zealand.

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The OECD is a unique forum where governments work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD member countries are: Australia, Austria, Belgium, Canada, Chile, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The European Union takes part in the work of the OECD.

OECD Publishing disseminates widely the results of the Organisation's statistics gathering and research on economic, social and environmental issues, as well as the conventions, guidelines and standards agreed by its members.

OECD Central Government Debt Statistics

2003-2010

Governments are amongst the major issuers of debt instruments in the global financial market. The present volume provides quantitative information on central government debt instruments for the 34 OECD member countries to meet the analytical requirements of users such as policy makers, debt management experts and market analysts. Statistics are presented according to a comprehensive standard framework to allow cross-country comparison. Country methodological notes provide information on debt issuance in each country as well as on the institutional and regulatory framework governing debt management policy and selling techniques.

ALSO AVAILABLE ON ONLINE AND CD-ROM

The data in this publication are available on line via www.oecd-ilibrary.org under the title *Central Government Debt* (<http://dx.doi.org/10.1787/data-00033-en>).

An offline edition of the database, providing data in CSV format is available on CD-ROM under the title *Central Government Debt: Statistical Yearbook, Volume 2011 Issue 1*.

Consult this publication on line at <http://dx.doi.org/10.1787xxx-en>.

This work is published on the OECD iLibrary, which gathers all OECD books, periodicals and statistical databases. Visit www.oecd-ilibrary.org for more information.
