Main features

The STAN database is primarily based on member countries' latest annual national accounts by economic activity statistics compiled according to the System of National Accounts 2008 (SNA08). Any estimates required for earlier years are based on previous vintages of STAN or SNA statistics (e.g. SNA93) while missing detail is estimated using data from other sources such as results from national industry surveys or censuses. In STAN, many data points are estimated and are flagged as such; they do not represent official member countries' submissions.

The latest STAN database uses an industry list based on ISIC Rev.4 and covers the years 1970 to 2018. This PDF publication presents data, as of July 2020, for six measures of industrial performance covering the years 2011 to 2018, for 23 OECD member countries. For more information on the STAN database, see <http://oe.cd/stan>.
