## Foreword

This publication contains key data series selected from the OECD Main Science and Technology Indicators Database (MSTI) accessible at <https://oe.cd/msti>. This publication consists of standard tables of data series regarding the resources devoted to research and experimental development (R&D) as well as some indicators of R&D output, and the impact of scientific and technological activities. Also presented are the underlying economic series used to calculate these indicators. It is complemented by a description of the general methodology used as well as national specifications available at [www.oecd.org/sti/inno/MSTI\\_documentation\\_e.pdf](http://www.oecd.org/sti/inno/MSTI_documentation_e.pdf).

## Signs and abbreviations

### R&D terminology

BERD	Business enterprise Expenditure on R&D (intramural)
FTE	Full Time Equivalent (on R&D)
GBARD	Government Budget Allocations for R&D
GERD	Gross Domestic Expenditure on R&D (intramural)
GOVERD	Government Expenditure on R&D (intramural)
GUF	General University Funds
HERD	Higher Education Expenditure on R&D (intramural)
NSE	Natural Sciences and Engineering
PNP	Private Non Profit Institutions
R&D	Research and Experimental Development
SSH	Social Sciences and Humanities

For further explanations of the above terms, please see the OECD Frascati Manual 2015, which includes a glossary of key terms: <http://oe.cd/frascati>

### Other

GDP	Gross Domestic Product
ISIC	International Standard Industrial Classification
PCT	Patent Co-operation Treaty
PPP	Purchasing Power Parity

## Sources and methods

Detailed methodological information: [www.oecd.org/sti/inno/MSTI\\_documentation\\_e.pdf](http://www.oecd.org/sti/inno/MSTI_documentation_e.pdf)

## Standard footnotes

The OECD zone includes all Member countries of the OECD except Costa Rica, that is, Australia, Austria, Belgium, Canada, Chile, Colombia, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Latvia, Lithuania, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Türkiye, the United Kingdom, and the United States.

The latest data for European countries, as well as Iceland, Norway, the Russian Federation, Switzerland and Türkiye, were collected by Eurostat.

b	Time series break.
c	Confidential statistical information.
d	Definition differs.
e	Estimated value.
k	Data included in another category.
l	Overestimated or based on overestimated data.
m	Underestimated or based on underestimated data.
p	Provisional value.
s	Unrevised breakdown not adding to the revised total.
v	The sum of the breakdown does not add to the total.
w	Includes data from another category.

From 2017, Eurostat follows slightly different, but generally compatible, conventions with regard to footnotes:

Countries only use flags 'b', 'c', 'd', 'e' and 'p'.

Only one flag may be submitted per data item (cell).

The flags follow a hierarchy:  $p > b > d > e$ . As an example, an estimated (e) and provisional (p) data will be annotated with a 'p'.

Estimated (e), overestimated (l) and underestimated (m) data are all annotated with an 'e' flag.

'd', 'k', 's', 'v' and 'w' flags are grouped as 'd' (definition differs).

In this publication, flags for these countries are published as they were received by the OECD from Eurostat, except in the following cases:

The single-flag rule is not applied when this would lead to suppress 'b' flags indicating breaks in series.

's' flags are not replaced with 'd'.

# Main Science and Technology Indicators

This biannual publication provides a set of indicators that reflect the level and structure of the efforts undertaken by OECD member countries and selected non-member economies (Argentina, China, Romania, Russian Federation, Singapore, South Africa, Chinese Taipei) in the field of science and technology. These data include final or provisional results as well as forecasts established by government authorities. The indicators cover the resources devoted to research and development, patent families, technology balance of payments and international trade in R&D-intensive industries. Also presented are the underlying economic series used to calculate these indicators. Series are presented for a reference year and for the last six years for which data are available.
