Main Economic Indicators

November 2023

This work is published under the responsibility of the Secretary-General of the OECD. The opinions expressed and arguments employed herein do not necessarily reflect the official views of the Members of the OECD.

This document, as well as any data and map included herein, are without prejudice to the status of or sovereignty over any territory, to the delimitation of international frontiers and boundaries and to the name of any territory, city or area.

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

Main country groupings

In the indicators-by-subject tables provided in Part I, data are given for individual member countries, the Euro area, European Union and for two major groups of countries (zones): namely, OECD-Total, and Major seven countries. The country composition of these groups is:

OECD-Total	The 38 OECD countries, unless otherwise specified.
Major-seven	The major seven economies of the OECD: Canada, France, Germany, Italy, Japan, the United Kingdom and United States.
Euro area	The 19 countries of the euro area.
EU27 (from 01/02/2020)	The European Union of 27 countries (as from 01/02/2020).

From 1 February 2020, the area total EU28 has been progressively replaced by the area total EU27 (from 01/02/2020). The time series in the tables extend beyond the date of the United Kingdom's withdrawal from the European Union on 1 February 2020. In order to maintain consistency over time, the "European Union" aggregate presented here excludes the UK for the entire time series. Interested readers may refer to the *Eurostat website* for further information on Eurostat's plans for disseminating EU aggregates and to the *Eurostat database* for the actual series.

In order to facilitate analysis and comparisons over time, historical data for all OECD Members have been provided over as long a period as possible, often even before a country became a member of the Organisation.

Information on the membership dates of all OECD Member countries can be found at <https://oe.cd/members-and-partners>.

Calculation of area totals

Euro area and European Union area aggregations are provided by the relevant European authorities. Several different methods are used to compile the OECD zone aggregates included in this publication and what follows are the general methods observed.

The aggregate is only calculated when at least 75% of the data is available; recent periods are used as the benchmark. If data are simply additive, *e.g.* Employment by persons, then the aggregate is compiled through simple addition. In these cases, estimates are made for missing countries' data.

For the remaining series, data are converted into a common currency using either US Dollars or purchasing power parities (PPPs) as the conversion factor or in the case of indices, weights are calculated using nominal gross domestic product or private final consumption expenditure in PPPs.

Where chain-linking is used, the method is normally an annual chain-linked Laspeyres index. In most cases, separate estimates for missing country data are not made as the chain-linking procedure implicitly undertakes these estimations.

1. Starting from June 2018, the UK data published for the entire period by the OECD refers to the ONS lead inflation index, i.e. the Consumer Price Index Including Owner Occupiers' Housing Costs (CPIH). This index is the most comprehensive measure of inflation in the UK. It extends the Consumer Price Index (CPI) formerly used by the OECD to include owner occupiers' housing costs along with Council Tax. More detailed information can be found at: www.ons.gov.uk/economy/inflationandpriceindices/articles/consumerpriceindicesabriefguide/2017.

Note: Detailed metadata at: <http://metalinks.oecd.org/mei/20231108/c88e2>.

Starting from June 2018, the UK data published for the entire period by the OECD refers to the ONS lead inflation index, i.e. the Consumer Price Index Including Owner Occupiers' Housing Costs (CPIH). This index is the most comprehensive measure of inflation in the UK. It extends the Consumer Price Index (CPI) formerly used by the OECD to include owner occupiers' housing costs along with Council Tax. More detailed information can be found at: www.ons.gov.uk/economy/inflationandpriceindices/articles/consumerpriceindicesabriefguide/2017.

AVAILABLE ON LINE

Main Economic Indicators

This monthly publication presents comparative statistics that provide an overview of recent international economic developments for all the OECD countries, the euro zone and a number of non-member economies.

This indispensable and unique source of key short-term statistics is a vehicle for analysis for corporate planners, economists, academics, researchers and students. Using the most up-to-date, user-friendly tabular presentation, the indicators cover national accounts, business surveys and consumer opinions, leading indicators, retail sales, production, construction, prices, employment, unemployment, wages, finance, international trade and balance of payments.

ALSO AVAILABLE ON LINE

The data in this publication are also available on line via www.oecd-ilibrary.org under the title *Main Economic Indicators* (<https://doi.org/10.1787/mei-data-en>).
