

## OECD Product Market Regulation (PMR) indicators: How does Sweden compare?

Competitive product markets can boost productivity, employment, and living standards. The OECD Product Market Regulation (PMR) indicators assess the alignment of a country's regulatory framework with internationally accepted best practices. The economy-wide indicator measures the distortions to competition that can be induced by the barriers to entry and expansion faced by firms across the economy, as well as by the involvement of the state in the economy. In this indicator, Sweden is among the best performers.

**Figure 1: Overall economy-wide Product Market Regulation indicator<sup>#</sup>**

<sup>#</sup>The information used to build all the PMR indicators for this country refers to the laws and regulations into force on 1 January 2023. The data for some of the other countries refers to 1 January 2024.

\*Please see notes on Israel and Cyprus on page 7.

## ECONOMY-WIDE HIGHLIGHTS

Sweden's regulatory framework is competition-friendly in almost all the areas included in the PMR indicators. However, there is still room to improve the mechanisms for assessing the impact on competition of new and existing laws, as well as the rules for stakeholder and lobbyist involvement in the regulatory consultation process. While the extent of state ownership in the economy is moderately high, the governance of state-owned enterprises is well-aligned with key OECD best practices aimed at ensuring a level playing field with private firms.

**Figure 2: Economy-wide Product Market Regulation indicators: Sweden's ranking<sup>+</sup>**

<sup>+</sup>The ranking is across all OECD members and Brazil, Croatia, Bulgaria, Indonesia, and Peru.

\* Licences and Permits, Lobbying, and Public Ownership are not indicators, but components of other indicators. Please refer to the table of correspondence on page 7.

<sup>^</sup>The values for the low-level indicator on Barriers to FDI are derived from the OECD FDI Restrictiveness indexes, whose values are still preliminary and may be subject to small changes.

Note: The names of the low-level indicators have been simplified for presentational purposes. Please refer to the table of correspondence on page 7.

## ECONOMY-WIDE HIGHLIGHTS: OBTAINING LICENCES AND PERMITS

Obtaining licences and permits can be cumbersome for businesses. This burden can be reduced when countries keep an inventory of all licences and regularly review it to remove licences that are no longer necessary, adopt the 'silence is consent' principle, and tailor the length and complexity of the licensing process to the risks inherent in the licensed activities. While Sweden's licensing regime is slightly less burdensome than in the average OECD economy, there is room to further align it with these best practices.

**Figure 3: Licences and Permits<sup>+</sup>**

<sup>+</sup> The information scored here is included in the PMR low-level indicator Administrative and Regulatory Burden.

## ECONOMY-WIDE HIGHLIGHTS: REGULATION OF LOBBYING ACTIVITIES

Many countries still do not have adequate rules that ensure transparency and accountability in the interactions between public officials and interest groups. This lack of regulation may favour the lobbying endeavours of larger incumbent firms, disadvantaging younger and smaller firms. Sweden imposes some disclosure requirements, such as requiring policymakers involved in the regulatory process to make their agendas publicly available and to reveal the identity of the lobbyists consulted. However, the country lacks an overarching law regulating lobbying interactions. Additionally, introducing conflict of interest rules and a cooling-off period for all public officials when leaving office could further enhance the regulatory framework.

**Figure 4: Lobbying<sup>#</sup>**

<sup>#</sup> The information scored here is included in the PMR low-level indicator Consulting on Legislation.

## SECTOR-SPECIFIC HIGHLIGHTS: SERVICE SECTORS

Despite Sweden's strong performance in the PMR indicators, improvements can be still made in the regulatory framework in the e-communications, air transport, and natural gas sectors. Professional services are less strictly regulated than in the average OECD economy, except for real estate agents. However, this is partially explained by the fact that real estate agents manage the conveyancing process in Sweden - a task typically handled by notaries or lawyers in other countries.

**Figure 5: Product Market Regulation indicators for service sectors: Sweden's ranking<sup>+</sup>**

<sup>+</sup>The ranking is across all OECD members and Brazil, Croatia, Bulgaria, Indonesia, and Peru.

# Please see note on page 7.

## SECTOR-SPECIFIC HIGHLIGHTS: DIGITAL MARKETS

New markets that rely on the intensive use of data have emerged, such as online marketplaces, search engines, cloud computing, and social media. As a member of the European Union, Sweden participates in the EU's efforts to assess and address the numerous competition challenges raised by the development of these markets.

**Figure 6: Product Market Regulation indicator on Digital Markets<sup>#</sup>**

<sup>#</sup> Only the information used to build this indicator refers to laws and regulations into force or under discussion in parliament on 1 January 2024.

1. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

2a. Footnote by Türkiye: The information in this document with reference to "Cyprus" relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Türkiye recognizes the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of the United Nations, Türkiye shall preserve its position concerning the "Cyprus issue".

2b. Footnote by all the European Union Member States of the OECD and the European Union: The Republic of Cyprus is recognized by all members of the United Nations with the exception of Türkiye. The information in this database relates to the area under the effective control of the Government of the Republic of Cyprus.

#Note on notaries: In civil law countries, notaries exercise administrative and judicial tasks by virtue of power delegated by the state; hence, they play a special role in the legal services market in the concerned countries and in this aspect they are different from the other professions included in the OECD's PMR indicator.

**The names of the low-level indicators in Figure 2 have been simplified for presentational purposes. This table of correspondence shows the name used in the official PMR dataset.**
