

Poland

Poland addresses certain PFASs under EU Regulations. All the actions taken by EU are generally taken in consultation with internal stakeholders in Poland (industry, NGOs). Poland has also taken voluntary action under the Control of Hazardous Substances in the Baltic Sea Region (COHIBA) project to raise awareness on PFOS.

RISK REDUCTION APPROACHES FOR PFASs

| Action | Path taken | BEPs Implemented | Category of PFASs addressed | Articles covered? | Life cycle stage(s) addressed | Method of approach | Public- private partnership encouraged? | Level of constraint |
|---|-------------------------|--------------------------|-----------------------------|--------------------------|-------------------------------|--------------------|---|--------------------------|
| HELCOM Baltic Sea Action Plan restricts use and encourages substitution in Baltic Sea Area | Manage use | No information available | PFOA and PFOS | No information available | No information available | Regulatory | - | No information available |
| Control of Hazardous Substances in the Baltic Sea region (COHIBA) assessed pollution in Baltic Sea and developed management options and contribute to development of national implementation plan | Manage use and disposal | No information available | PFOS and PFOA | No | Waste | Voluntary | Yes | None |
